3C services

The carefully constructed range of services we offer enables us to cater for all of the water treatment and air hygiene requirements of our clients. The level of service offered ranges from one off site visits to take water samples, to the provision of maintenance agreements encompassing the management of multiple site portfolios where our responsibility extends to undertaking all Legionella Control works and water treatment dosing and equipment maintenance.

We undertake the complete management of all electronic and site Log Book records and provide the necessary reporting procedures to ensure effective control of all water systems including closing out non conformances where they arise. In all instances we are able to offer a flexible and cost effective solution.

All services are carried out by suitably qualified employees with extensive internal and external training provided in their chosen field of expertise. With management staff being members of the Water Management Society and the company being accredited by the Legionella Control Association we have a wealth of experience and knowledge that is utilised by our clients.

We frequently assist in devising and implementing Legionella Control policies and procedures and provide technical advice on all aspects of water and air hygiene and treatment. Please contact us to arrange a free appraisal of your needs.
